

Nested - Try - Catch

```
try {  
    try {  
    }  
    catch { }  
}
```

```
catch (Exception e) {  
}
```

```
try {  
    try {  
    }  
}  
catch { }
```

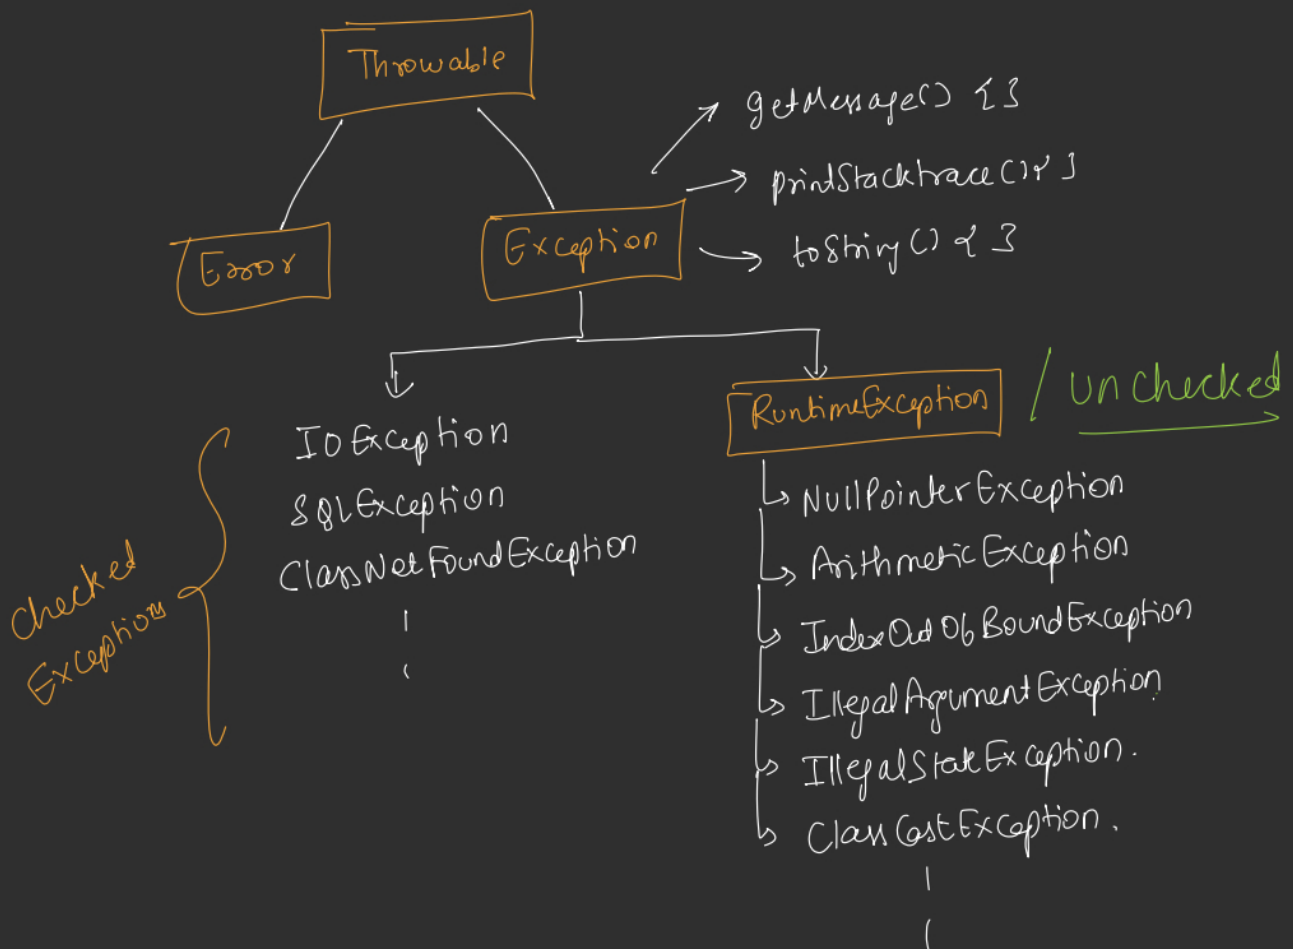

Case 1:

Case 2:

```
try {  
    //  
}  
catch {  
    try {  
    }  
    catch { }}
```

Avoid Nested-try (X)

Hierarchy of Exception Handling

throw

throws

Custom Exceptions

↳ throw IllegalArgumentException

Invalid Age Exception

```
class InvalidAgeException extends Exception {  
    public InvalidAgeException (String msg) {  
        super(msg);  
    }  
}
```

try-with-resources

Resource

- ↳ File
- ↳ DB Connection
- ↳ N/w socket

```
try {  
    //  
}  
catch {  
    //  
}  
finally {  
    //  
}
```

```
try (FileReader fr = new FileReader("abc.txt")) {  
    //  
}  
catch (FileNotFoundException e) {  
    //  
}
```
